

A innovative Foot Pedal for Wheelie Bins

Designed for the Health Care industry

A foot pedal that is a separate unit to the bin

Designed for all concerned for wheelie bin waste management procedures

In-house

Cost affective no need for a foot pedal on every bin

No more scratching the floors or damaging the walls when the bin is turned around access the handles of the bin

Clinicians : Foot Pedal for hygienic waste disposal

Ultra smooth and balanced foot pedal operation

Waste removal staff : Rotational base and one simple clip to attached or detach foot pedal from the wheelie bin

Rotational base allows for ease of initial movement of heavy bins

Off site transportation of bins

No foot pedal to hinder double stacking of bins

Retains the same foot print of the wheelie bin

No need for protruding handles on lid of bin

Waste disposal plants

No foot pedal attached to the bin

Bin can be still emptied and cleaned by automation equipment

Any number of bins can be easily converted to suit our foot pedal system.

Designed to suit all sizes of wheelie bins

Simple and easy to use

- Place bin on base unit
- Clip foot pedal to bin
- Spin bin around
- Now it is ready to use

When it is time to place the bin out for emptying, just rotate the bin with the aid of **Wheelie Go Round**, unclip the foot pedal and now you can move the bin in a **safe, easy and convenient** manner.
