

Guide to waste recyclers

servicing the Gold Coast

**Recycling is only one way to deal with waste.
Help the environment by practicing the three R's:**

Reduce waste

- buy only what you need
- avoid buying disposable goods
- make fewer copies and print on both sides
- use 100 per cent recycled printing paper
- post announcements on bulletin boards or circulate copies

Reuse waste

- reuse materials where possible
- consider offering goods you no longer need for second-hand use
- reuse recovered resources such as demolition materials
- use reusable envelopes for interoffice mail

Recycle waste

- if waste cannot be used in its present form, try to recycle

For more information or to submit content contact:

Gold Coast City Council

Waste Management

PO Box 5042 Gold Coast MC Qld 9729 Australia

Ph: 07 5582 8799

Rags (used oily rags)	20
Scrap metal	21
Smoke alarms.....	22
Timber (re-usable) and off cuts	23
Tyres.....	23
Council waste facilities.....	24

Bulk recycling services

Save time, money and the environment by using a commingled recycling service.

Gold Coast City Council is able to provide commingled recycling services to any commercial premise on the Gold Coast.

This service allows businesses to combine plastics, steel, aluminium, cardboard and paper into one bin.

These services can also be arranged for special events.

Advantages of Council's commingled recycling service:

- save space – all recycled items go in the one bin
- save time and money (one supplier for all your recycling needs)
- no contracts
- serviced up to two times a week
- free training aids for staff

Items that can be recycled include:

- ✓ clean cardboard, newspapers, magazines and cartons
- ✓ all rigid plastic containers (excluding styrofoam)
- ✓ aluminium cans, steel cans and aerosols
- ✓ glass jars and bottles

For a free consultation contact Council's Waste Management section on 5582 8799.

Transfer stations

- Council's waste transfer stations at Beenleigh, Jacobs Well and Miami will accept scrap metal, except for car bodies, for recycling. Domestic only. See page 24 for locations.

Smoke alarms

There are two types of smoke alarms, older models have an ionization detector while newer models have a photoelectric detector. Smoke alarms containing an ionization detector have a very small amount of radioactive material. The emission is no more than what is naturally produced. For disposal of a faulty smoke alarm wrap it in paper and place in the household garbage. Batteries should be disposed of separately. (see battery recycling).
