### Cytotoxic Waste (Purple Bins)

Waste bin is lined with PURPLE plastic bag with CYTOTOXIC SYMBOL and PURPLE lid.

All non-sharp waste generated in the management of cytotoxic therapy (i.e. gloves, masks, aprons, packaging and tubing) is placed into these bins. All SHARP waste generated at the time (i.e. needles, vials, sharps, syringes and tubing) are to be placed in the specific purple sharps containers, which are then placed into the cytotoxic waste bin.

Sample only poster
